

Dear HOA,

On behalf of AT&T, I want to take this opportunity to provide you with information concerning the AT&T fiber placement activities taking place in Plano, Texas and the Dallas/Fort Worth area. As you may be aware, AT&T has begun the construction process for the deployment of our exciting new AT&T GigaPower<sup>SM</sup> service in some areas within Plano. These activities are scheduled to take place during the 2<sup>nd</sup> Quarter of 2016. The AT&T approved contractors placing the fiber will follow city ordinances.

AT&T is committed to restoring areas disturbed during the construction process, which is our general business practice across the company. Our AT&T approved contractors and AT&T management team will work with the impacted residences during the course of this process. We know the construction process of any kind (water, sewer, power, cable, etc.) has the potential to be disruptive. Our objective is to minimize the disruption while deploying upgraded AT&T fiber facilities for the AT&T GigaPower<sup>SM</sup> services.

AT&T appreciates your patience during the process. If you have any questions, please call or email us via the information below; someone from our GigaPower Management Team will respond within 24 to 48 business hours.

Phone #: 972-370-8478

Email: [g43578@att.com](mailto:g43578@att.com)

Thank you,

*Gary Vaughan*
